

To whom it may concern:I am an XM subscriber who enjoys the diverse selection of stations provided by XM radio. I spend a lot of time listening to the radio while traveling, including AM/FM stations. Whether I am travelling to NY City or Philadelphia, I know I can always tune to the corresponding city's traffic and weather station on XM to get the latest updates on traffic situations without having to search through the local AM/FM stations. I just wanted to share my experiences after hearing of your efforts to stop XM Radio from providing local oriented content. I also don't understand how any organization can deny a company from providing a completely legal, non-controversial service to the public.

Sincerely,

Wayne Horvath
